EXECUTIVE SUMMARY
RULES AND REGULATIONS FOR ARKANSAS' TRADITIONAL APPRENTICESHIP PROGRAMS

**Pursuant to Act 684 of 1989; Acts 546, 553, and 10 of 1991; and
as amended by Act 830 of 1993, Act 140 of 2015, Act 1122 of 2015,
and Act 369 of 2019**

- A. ~~Objectives of Apprenticeship Training: The objectives of apprenticeship training are to (1) help fill the country's industrial, commercial, and private sector needs for qualified, skilled craft persons; (2) teach and develop good work habits; (3) assure that skills are passed from one generation to the next; (4) provide a concurrent and or alternative to other educational programs for those high school graduates who want to enter the trade or technical fields; and (5) offer a training program in which an individual earns while learning.~~
- B. ~~General: Apprenticeship training is a method of training an individual in a skilled occupation through a combination of on-the-job training and related classroom instruction. Both on-the-job training and related classroom instruction are required to produce a skilled worker. Apprenticeship develops a most valuable asset - development of a skilled and knowledgeable workforce in which the people have made an investment through the educational system. Less tax support is required for apprentice training programs because of the contributions of segments of the industry employing the apprentices. Because the apprentices are working students, they are taxpayers. In many cases apprentices contribute more money to the tax system than the cost to the system of their education. The self-sufficient apprentice working toward greater employability makes a better citizen. The public is assured of a higher quality of workmanship in the products they use or consume. The apprentices are potential business and community leaders of the future as well as stable workers and citizens.~~
- C. ~~Eligibility for Apprenticeship: Applicants must be citizens of the United States or legally qualified to work if they are not citizens. There can be no discrimination among qualified applicants because of race, creed, color, sex or national origin. Minimum age and education requirements are established by the individual training committees. Normally the minimum age will vary from 16 to 18. In most cases a high school education is required. Usually the required education equivalency may be established through the General Education Development Certificate. Various other qualifications are established by each training committee to meet the needs of its particular craft. Under no circumstances will the apprenticeship system discourage any person from completing a high school education in order to enter an apprenticeship program.~~
- D. ~~The Apprenticeship Committee: Apprenticeship training programs are normally conducted by a sponsor or sponsors through a training committee. These committees also are known as Local Apprenticeship Committees. If there is more than one sponsor, each is represented equally on the committee. If management~~

and labor co-sponsor a program, each is equally represented and the committee is called a Joint Training Committee or Joint Apprenticeship Committee. The apprenticeship committee is an autonomous local group which provides for the orderly operation of the apprentice training program for a particular craft or technical area. Each trade or craft will have its own committee.

- E. ~~Instructors: Related classroom instructors are selected/recommended to the local education agency by the training committee. Instructors should have a high school education or establish, through a general education development test, that they have the equivalent of such education. Five years of experience may be required in the appropriate trade or technical area with at least two of these years as a journeyman. The instructors are encouraged to continue their own education through available means. For teaching such subjects as craft-related mathematics and blueprint reading, persons other than the journeyman are considered; teachers with the ability to relate subject matter to job conditions may be used for these subjects with the approval of the local education agency.~~
- F. ~~Monitoring and Evaluation: After establishing a program, one of the prime concerns of the committee is the monitoring and evaluation of the training. This is a responsibility of the Local Apprenticeship Committee, U.S. Department of Labor, Office of Apprenticeship (USDOL/OA), and the State Apprenticeship Office (SAO) of the Arkansas Department of Commerce, Office of Skills Development, through which funds are provided. It provides a means of determining the effectiveness of the instructors and of the training program. Monitoring of classes begins immediately where new instructors are involved. This is advantageous to the Local Apprenticeship Committee in determining where deficiencies may exist. To determine whether or not the training program is accomplishing its purpose, the Local Apprenticeship Committee relies on employee reports and testing of students in the classroom. Changes are incorporated where needed. Evaluations are made less often in older programs or those with experienced instructors. The requirements will vary among trades and technical committees, with each committee determining its own needs.~~
- G. ~~Funding: Act 10 of 1991 allows eligible recipients (program sponsors) to submit applications for funds to improve apprenticeship related classroom instruction. All application amounts will be developed on the basis of the current contact hour rate not to exceed a maximum contact hour rate established by the Arkansas Apprenticeship Coordination Steering Committee (AACSC). Depending on the number of programs, the current contact hour rate of funding may be less than the maximum rate established. The AACSC in consultation with the State Apprenticeship Office, the Department of Commerce, Office of Skills Development, shall establish the current contact hour rates. Normally, programs will be funded up to a maximum of 160 hours of instruction per instructor.~~

~~Pursuant to Act 684 of 1989, a public school district and a state postsecondary/higher education institution may receive an administrative fee to cover the costs of processing the records of the apprentice which shall not exceed~~

~~\$25 per apprentice per school year. No more than 15% of the state funds may be used by the program sponsor for administrative purposes such as supervisory and/or secretarial salaries, travel, office supplies, etc. The AACSC may require an independent audit (to be paid for by the program) of any program.~~

~~H. Application: Every application must address each of the requirements of the application. The State Apprenticeship Office reserves the right to reject any and all applications that address only part of the requirements contained in the application. It should be clearly understood that an approved application will not necessarily receive the requested amount if a lesser amount is determined to be appropriate.~~

~~One application with original signatures must be submitted. Applications sent by mail should be addressed to:~~

~~State Apprenticeship Office
Arkansas Department of Commerce, Office of Skills Development
#3 Capitol Mall
Little Rock, AR 72201-1083~~

~~Hand delivered applications will be accepted at the above address daily between 8 a.m. and 4 p.m., except Saturdays, Sundays, and holidays. In establishing the time and date of receipt, the State Apprenticeship Office will rely solely on the date stamp of the State Apprenticeship Office, Arkansas Department of Commerce, Office of Skills Development.~~

~~I. Program Starting and Ending Dates: The local program sponsor may determine the need for providing apprenticeship programs at various times during the year. Therefore an application may be submitted at any time. However, the application will be reviewed and approved/disapproved at selected times. Due to the limits on program improvement funds and the need to use these funds efficiently, the AACSC will establish deadline dates each year.~~

~~J. Registered Apprentices and Programs: All apprentices and apprenticeship programs must be registered with the USDOL/OA. Requests for appeals to the approval and/or funding process should be addressed to:~~

~~Director
Department of Commerce, Office of Skills Development

~~RULES AND REGULATIONS~~
~~FOR~~
~~THE CONSTRUCTION INDUSTRY CRAFT TRAINING~~
~~EDUCATION PROGRAM~~

~~09/02/1999~~
~~Pursuant to Act 474 of 1999~~
~~as amended by~~
~~Act 785 of 1999~~

~~October 14, 1999~~

SUMMARY AND OVERVIEW

1— It is understood that the intent and purpose of Act 474 (as amended) is to promote and develop a highly
2— skilled construction workforce in the state of Arkansas that will be equipped to better address the
3— challenges of the constantly changing construction industry due to new and emerging technology as
4— well as bolster the dwindling number of persons entering this highly competitive arena. This mission
5— can only be accomplished by recruiting and retaining competent workers for the industry. The key to
6— developing this future workforce is developing new resources that address changes in technology,
7— implementing stronger skills training programs backed by the theoretical knowledge that provides not
8— only top quality technical skills but problem solving and customer relations skills, and the incentives
9— necessary to retain this skilled workforce once they are trained.

10— The creation of the Construction Industry Craft Training Education Program is a positive and
11— innovative approach to meeting the needs of the industry. The goals will be met if you, as an industry,
12— concentrate our efforts and we dedicate our selves and our available resources to a training program for
13— our state that is fair and equitable to all members of our industry. With this understanding and
14— commitment, the following are proposed as guidelines for the operation of training programs in our
15— state.

16— Of the funds collected and allocated for use for training, the AACSC will set an amount yearly not to
17— exceed twenty percent (20%) of the total funds for the infusion of curriculum into the public schools
18— as well as the construction education institutions of our state. This money will be used for the
19— purchase of curriculum only. The remaining funds may be used for the purchase or
20— lease of equipment, training materials, payroll expenses, administrative costs directly related to
21— the training of the workforce, and other items covered specifically in the following “Rules and
22— Regulations”. Leasing equipment is the preferred method of procuring equipment for the purpose of
23— Training. With the exception of equipment costs (which will be funded at 100% up front), 50% of a
24— program’s approved funds will dispersed upon AACSC approval. The balance of the funds due will be
25— dispersed at the conclusion of the training.

26— The final reports (which reflect actual numbers of persons trained and the hours of instruction

~~1—completed) submitted by the program will determine the amount of funds actually sent to the
2—program sponsor.
3—The Arkansas Department of Workforce Education in collaboration with the Arkansas
4—Apprenticeship Coordination Steering Committee (AACSC) will make every effort to see that the
5—distribution of these funds is fair and equitable. All funds must flow through a Local Education
6—Agency as defined herein. Any disputes arising about the disbursement of funds will be addressed at
7—the earliest regular meeting of the AACSC and a majority decision of the committee will be issued.
8—The decision of the committee will be final.
9—Because this is a new and innovative program, changes will be required at some point in the future.
10—The AACSC will make every effort to address these changes as they develop. You, the industry, will
11—be the reason for any and every change made.~~
